WET OR DRY PUTTY TECHNICAL REFERENCE INFORMATION

GENERAL PRODUCT INFORMATION

USERS DATA

Ratio by weight	4:1		
Ratio by volume	3:1		
Pot Life 500g minutes @ 24°C	25		
Mixed colour	Grey		
Mixed consistency @ 24°C	Paste		
Specific gravity when mixed	1.95		
Coverage, kg/m ² @ 1 mm	2		
TYPICAL CURED PROPERTIES			
Compressive strength ASTM D695, Mpa	64		
Tensile strength ASTM D638, Mpa	18		
Flexural strength ASTM D790, Mpa	22		
Hardness, Shore D	80		
Thermal conductivity ATSM C177, Kcal/m.hrºC	0.60		
Coefficient of thermal expansion ASTM C531	2.0		
(cm/cm/°C) x 10-5			
Dielectric constant ASTM D150 (150KHz)	3.0		
Maximum operating temperature, °C	105		
Heat deflection temperature ASTM D648, °C	65		
Cure to handling @ 5mm, Minutes	90		
Cure time @ 5mm. Hours	24		

WET OR DRY PUTTY is a repair putty suitable for use in patching and repairing applications subjected to excessive dampness, or in underwater situations, as well as those experienced in dry conditions. This special formulation enables emergency repairs to be carried out with minimal surface preparation. It will even cure at very low temperatures to a tough inert material.

TYPICALLY USED ON:

Boat hulls Flanges Pipes Shafts Support piers Vessels Drainage systems General adhesive duties Pumps Storage tanks Valves

CHEMICAL RESISTANCE

Tested at 21°C. Samples cured for 10 days at 25°C. Curing at elevated temperatures (ie: > 45°C) will improve chemical resistance.

1 =	Continuous	or long	term immersion	
-				

- 2 = Short term immersion
- 3 = Splash and spills
- 4 = Avoid contact

Acetic Acid, 10 %	2	Acetone	2
Acetic Acid, Glacial	2	Ammonium Chloride	1
Hydrochloric Acid, 5 %	1	Beer	1
Hydrochloric Acid, 10 %	1	Dichloromethane	4
Hydrochloric Acid, conc	2	Diesel Fuel	1
Nitric Acid, 5 %	2	Isopropyl Alcohol	1
Nitric Acid, 10 %	3	Kerosene	1
Phosphoric Acid, 5 %	1	Petrol	1
Phosphoric Acid, 20 %	2	Salt Water	1
Sulfuric Acid, 5 %	2	Sewage	1
Sulfuric Acid, 20 %	3	Skydrol	1
Ammonium Hydroxide, 5 %	1	Sodium Cyanide	1
Ammonium Hydroxide, 20 %	1	Sodium Hypochlorite	1
Potassium Hydroxide, 5 %	1	Toluene	2
Potassium Hydroxide, 20 %	1	Trichloroethane	2
Sodium Hydroxide, 5 %	1	Wine	1
Sodium Hydroxide, 20 %	1	Xylene	2

This information is supplied as an indicative reference only. Caution should be used where direct comparisons are to be made.

SURFACE PREPARATION

It is essential that all surfaces to be treated are properly prepared to obtain a strong bond between the substrate and the product.

- All oil, dirt and other loose contamination must be removed by washing. degreasing or blasting.
- Surfaces should preferably be abrasive blasted although roughening using mechanical alternatives such as wire brush or abrasive disc can be used to leave a clean surface, free of scale, rust and other foreign substances.

For maximum adhesion to metallic surfaces, grit blast to expose a sound substrate with a nominal surface profile of 50-80 micron. Application should take place immediately after preparation to avoid oxidation of the freshly prepared surface.

operation in sea water or petroleum products may necessitate alternate preparation procedures. Consult National or International standards where possible.

Apply a very thin scratch or smear coat directly to the prepared surface to maximize surface contact before proceeding to apply additional product to the desired build. Ensure product has been worked into all cracks and voids to eliminate air bubbles. If applying several coats or layers, any previously applied product must be roughened if it has been left to cure for more than 24 hours.

HEALTH HAZARD INFORMATION

Health Effects

Swallowed:	Possible irritant. Can result in nausea, vomiting, stomach pain or discomfort.	
Eye: Skin:	Irritation, no corneal damage likely. Possible irritant. Prolonged or repeated uncontrolled exposure may lead to dermatitic effects.	
Inhaled:	None likely, unless heated to extremely high temperatures, in which case irritation of the respiratory tract may occur.	
First Aid		
Swallowed:	DO NOT induce vomiting. Give a glass of water and contact a doctor or the Poisons Information Centre.	
Eye:	Hold eye lids open and flood with water for 15 minutes. See a doctor.	
Skin:	Remove contaminated clothing, wash affected area with soap and water. If swelling or blisters occur, seek medical attention.	
Inhaled:	Not considered likely, however, if effects are perceived, remove to fresh air and rinse mouth and nasal passage with water.	
PRECAUTIONS FOR USE

Variations in cure may arise due to the amount of material being applied, the thickness of material being applied, the surface temperature, and the product temperature. The cure may be increased by applying external heat to the prepared surface before application of the product. This can be done with heat lamps or other heat sources. The cure may be decreased by cooling the product

Surfaces that have been exposed to extreme environments such as continuous

Store away from heat and direct sunlight. A minimum of 2 years should be expected if held in original unopened containers.

Since the storage, handling and use of this product is beyond our control, this product is supplied without guarantee. Furthermore, nothing should be construed as a recommendation to use this product in conflict with existing

SAFE HANDLING INFORMATION

No special transporting requirements. When storing, do not allow to freeze and store below 35°C, i.e. Store
between 5°C and 35°C.
Pick up and consult local authorities for disposal.
Alternatively, cure as per directions for use and landfill.
This product is non flammable, it may burn although auto
ignition is highly unlikely. Fumes in the form of oxides of
carbon and nitrogen will be evolved during combustion.
Self contained breathing apparatus should be available
for firemen and water sprays, foam, dry chemical or CO2
should be used.

This MSD summarises our best knowledge of the health and safety hazard information of the product and how to safely handle and use the product in the workplace. Each user should read this MSD and consider the information in the context of how the product will be handled and used in the workplace including use in conjunction with other products. If clarification or further information is needed to ensure that an appropriate risk assessment can be made, the user should contact the manufacturer.
